

World Engineers' Convention 2011

Call for Papers

Second announcement

Deadline for abstract submission: January 15th, 2011

Engineers from around the world will gather in Geneva from 4-9 September 2011 for the fourth World Engineers' Convention (WEC 2011). Under the title **Engineers Power the World – Facing the Global Energy Challenge**, WEC 2011 will focus on energy, one of the biggest challenges of the 21st century. Now the time has come to invite all engineers, researchers, other professionals and entrepreneurs from all over the world to submit their papers in order to share their successful researches, experiences and knowledge.

Main topics

The focus lies on best practice, and/or future promising solutions for a sustainable use of energy. The contributions expected must refer to the main themes of the convention:

- | | |
|-------------------------------------|--|
| (1) Global challenges | (5) Energy conversion and distribution |
| (2) Education in engineering | (6) Renewable energy and storage |
| (3) Mobility and transport | (7) Rational end use and large consumers |
| (4) Urban development and buildings | |

Abstracts, papers and submission

The topics can be addressed according to three main sets of approaches:

- Engineering and technology
- Systemic issues (including economics, environment, life cycle)
- Socio-political considerations (including policies, public information and debate)

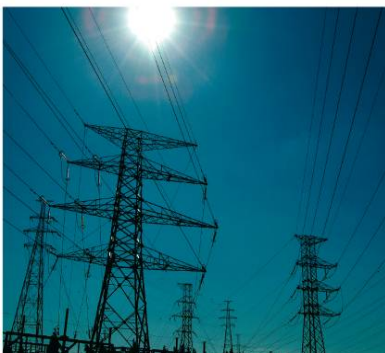

Fundamental research that is far from transfer into practice is not the focus of WEC 2011. The abstracts must be detailed at a length of approximately 800 words and must be submitted online on the website. The final papers should be 4000-5000 words and are to be presented either orally or as a poster.

Key Dates

Deadline for abstract submissions	January 15 th , 2011
Notification of acceptance of abstracts	January 31 st , 2011
Deadline for submission of final papers	March 31 st , 2011
